

REVINO *bottles*

We're on a mission to save the planet by collecting, washing, and reusing wine bottles.

Here's the Problem:

- The United States is the only industrialized country without a nationwide return and reuse glass bottle system.
- **16.2 billion** glass bottles and containers are consumed annually. Less than **30%** of those are actually recycled.
- U.S. production of glass bottles has always been below industry demands, causing a reliance on imports and fluctuations due to global pressures.
- A single glass wine bottle generates an estimated **1.28 kg** of CO₂, which is more than the wine itself!

Here's the Solution:

Meet Revino

Revino provides wine bottle reclamation and sanitation services to wine producers while building a robust local and sustainable glass supply network. Our process operates in an infinite loop starting with bottle manufacturing and distribution, moving to consumption and redemption, and ending with bottle sanitization and reuse.

We're setting up shop in wine regions across the west coast. But our plans for expansion match the size of the problem we face in this single-use glass bottle ecosystem – BIG! Look for us in your region and keep an eye out as we expand our services to support beer, kombucha, and other beverage producers in the future.

By The Numbers

85%

The percentage of emissions reductions Revino bottles offer in comparison to single-use bottles.

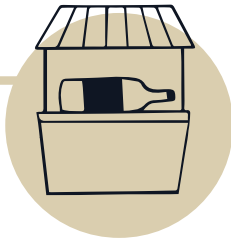

3

The # of reuses a bottle needs before breaking even on carbon emissions. Even better news: Reusable bottles can be utilized up to 50 times with proper care.

30

Our goal for the number of wineries that will use our returnable bottles in 2024.

2.4 million

The number of returnable, reusable wine bottles that will go into production in 2024, split between cork and Stelvin finish types.

16.2 billion

The number of food/beverage glass containers shipped to US producers in 2022

9 to 30%

The number of those bottles that are actually recycled. None are reused commercially.

2024

Our bottles will be available for the Spring 2024 bottling season!

TIMELINE

- **January 2021:** Revino founded. Let's save the planet!
- **November 2022:** Founders tour Italy to visit washing facilities and meet equipment suppliers.
- **July 2023:** Bottle mold designs finalized in collaboration with over 70 wine producers.
- **Q1 2024:** Initial bottle order scheduled for production and delivery to wineries.
- **Q1 2024:** First bottlings of Pinot Noir, Pinot Gris, Chardonnay, and other varietals in refillables.
- **Q2 2024:** Collection routes begin for returned wine bottles.
- **Q3 2024:** Washing facility build out and equipment installation. Initial testing of sanitation line with 3rd party sterility testing and quality checks.
- **Q4 2024-2025:** Expansion into additional markets, Burgundy flint glass, and Bordeaux bottle molds.
